

RFID Tag

TAG-26

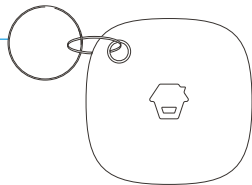

Operation Manual

to disarm the alarm system and automatically opens the connected electronic door lock.

Appearance

Key Chain

Features

The RFID tags utilize an induced antenna coil voltage for operation. The memory chip on the RFID card contains a unique identification code. This code can be sent when it's placed close to the RFID reader of control panel. Due to low power consumption of the logic core, no supply buffer capacitor is required. The RFID tag enables

Specifications

Built-in Circuit	EM4100 CMOS circuit
Operating Frequency	125khz
Dimensions (L x W x H)	30X30X6
Case Material	Plastic Compound

CHUANGO®

产品型号	TAG-26	部件名称	说明书
设计	林寿	材料	80克书写纸
印刷尺寸	145X105mm	成品尺寸	72.5X52.5mm
工艺	折页	版本	Ver: TAG-26-EN-1301-V1.0

注:

双色、单面印刷
